TASK - 4

LINEAR DIAGRAM

FIXING A PRODUCT CONFIGURATOR APPLE AIR VISION

1 IDENTIFY ISSUES
Determine what isn't working correctly. This could be anything from bugs in the software to user interface problems.

2 GATHER REQUIREMENTS
Understand what the users need and expect from the configurator.

3 UPDATE SOFTWARE
Ensure that the software is up-to-date and compatible with the latest technologies

4 IMPROVE USER INTERFACE
Make the interface intuitive and user-friendly

5 TEST THOROUGHLY
Conduct extensive testing to ensure that all features work as expected.
